DETAILED ACTION

Amendment

1. Acknowledgement is made of Amendment filed 2 January 2004.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Terril Lewis (Reg. no. 46,065) on 21 January 2004.

IN THE CLAIMS:

Re claims 1-7, 34-47, 78-86, 204-216 and 218: Please cancel claims 1-7, 34-47, 78-86, 204-216 and 218 without prejudice and/or traverse.

Re claim 186, line 1: Substitute "The method of claim 185" with "The method of claim 183".

Allowable Subject Matter

3. Claims 58-66, 176-184, 186-189 and 217 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to teach or fairly suggest a method for allowing a consumer to pay for a good or service having a purchase price at a vending machine using a system, the method including receiving at the system consumer account registration information to establish at least one electronic consumer account accessible by the system; receiving a form containing

Art Unit: 2876

information about the consumer into the vending machine, wherein the form constitutes one of a plurality of forms receivable by the system; optically analyzing the form to electrically determine which one of the plurality of different types of forms has been received at the system and to determine information about the consumer; and using the information to electronically charge the purchase price from the at least one consumer account.

Sharrard teaches a method for determining information about a consumer prior to enabling the vending of a good or service from a machine, including receiving an identification-card containing information about the consumer at the machine; using an optical reader to read the information, such as a birth date, on the identification card to determine the age of the customer; and enabling the vend on the basis of the information.

DeBan teaches a system including at least one terminal containing a check reader capable of taking a magnetic ink character recognition of a consumer identification form; and at least one memory device within the at least one terminal for storing templates to assist in the analysis of the optical image to determine the consumer information.

However, Sharrard and DeBan, taken alone or in combination thereof, fails to specifically teach a method of vending good or service having the steps of receiving a form containing information about the consumer into the vending machine, wherein the form constitutes one of a plurality of forms receivable by the system; optically analyzing the form to electrically determine which one of the plurality of different types of forms has been received at the system and to determine information about the consumer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2876

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
